IOSH Managing Safely

IOSH Managing Safely

We know that getting people fully involved, having fun and learning by doing, is the way to achieve safety and health training success. We want to get delegates really thinking about what they're learning – and having the confidence and enthusiasm to put it into practice when they're back at work. This course is unlike any other. You'll find a practical programme full of step-by-step guidance, and with a sharp business focus. But you'll also find that the highly innovative format and content engage and inspire delegates – critical to getting essential safety and health messages across.

- A flexible course (minimum 22 hours of face-to-face contact) covering the safety and health management basics in a high-impact interactive package.
- Flexibility to deliver the course over three days.
- High-quality animated graphics created exclusively for the course.
- A sophisticated but fun presentation.
- First-class technical content, based on what delegates need to know in practice.
- No jargon or off-putting legal language.
- Clear scenarios that managers can relate to.
- Ready-to-use training tools, including films and quizzes.

Who is Managing Safely for?

Managing Safely is for managers and supervisors in any sector, and any organisation. It's designed to get managers up to speed on the practical actions they need to take to handle safety and health in their teams.

What will they get out of it?

Delegates will learn what they need to know – and are perhaps reluctant to learn about – in a refreshingly informal way. Managing Safely won't turn delegates into safety experts – but it will give them the knowledge and tools to tackle the safety and health issues they're responsible for. Importantly, it brings home just why safety and health is such an essential part of their job.

Successful delegates are awarded an IOSH Managing Safely certificate.

What will employers get out of it?

- Globally-recognised and respected certificated training for their managers and supervisors
- Peace of mind offered by training that's designed and quality-assured by the Chartered body for safety and health professionals
- Straightforward, high-quality training designed by a team of specialists
- A ready-to-go programme pack – we've done the hard work, saving trainers the headache and the hassle
- Full back-up from our support team on every aspect of training, from advice on the training environment to guidance on marking assessments
- Free technical updates

And the end results are...

- Fewer hours lost due to sickness and accidents, resulting in greater productivity
- Improved, company-wide safety awareness culture and appreciation for safety measures proactive staff involvement to improve the workplace - enhanced reputation within the supply chain

Managing Safely Modules...

1 Introducing Managing Safely

Some managers may see safety and health as an add-on to their role – even an intrusion. The first module makes it clear that managers are accountable for their teams and makes a persuasive case for managing safely.

2 Assessing risks

This module defines and demystifies 'risk' and 'risk assessment'. Risk assessments and a simple scoring system are introduced, and delegates carry out a series of assessments.

3 Investigating incidents

The session starts with why incidents should be investigated, and goes on to cover why things go wrong, and how to carry out an investigation when they do.

4 Measuring performance

This module explains how checking performance can help to improve safety and health. Delegates learn how to develop basic.

5 Controlling risks

Here the session tackles cutting down risks, concentrating on the best techniques to control key risks, and how to choose the right method.

6 Understanding responsibilities

This module looks at the demands of the law and how the legal system works, and for those who do not have strict guidelines or laws, there is guidance and placeholders to fill with relevant information and introduces a safety and health management system.

7 Understanding hazards

All the main issues any operation has to deal with are covered in this module – aggression and violence, asbestos, bullying, chemicals, computer workstations, confined spaces, drugs and alcohol, electricity, fire, getting in and out, heights, housekeeping, lighting, manual handling, noise, plant and machinery, radiation, slips and trips, stress, temperature, vehicles and transport, and vibration.
